Peripheral Pump

Materials

Components	CT 61	B-CT 61					
Pump casing	Cast iron GJL 200 EN 1561	Bronze G-Cu Sn 10 EN 1982					
Casing cover motor side	Brass P- Cu Zn Pb 2 UNI 5705						
Impeller	Brass P- Cu Zn Pb 2 UNI 5705						
Shaft	Chrome steel AISI 430						
Mechanical seal	Carbon - Ceramic - NBR						

Construction

Close-coupled peripheral pump (regenerative pump) with turbine impeller. Compact, patented construction with single-piece motor casing and pump-side wall.

Protected against water entering the motor from outside.

CT: version with pump casing in cast iron.

B-CT: version with pump casing in bronze
(the pumps are supplied fully painted).

Applications

For clean liquids without abrasives, without suspended solids, non-explosive, non-aggressive for the pump materials. For increasing network pressure (follow local specifications). For the reduced dimensions, these pumps are very well suitable to be mounted in cooling and air-conditioning machines and equipments, circulation.

Operating conditions

Liquid temperature up to 60 °C. Ambient temperature up to 40 °C. Total suction lift up to 7 m. Continuous duty.

Motor

2-pole induction motor, 50 Hz (n ≈ 2900 rpm).

CT 61: three-phase 230/400 V ± 10%.

CTM 61: single-phase 230 V ± 10%, with thermal protector.

Capacitor inside the terminal box.

Insulation class F. Protection IP 54.

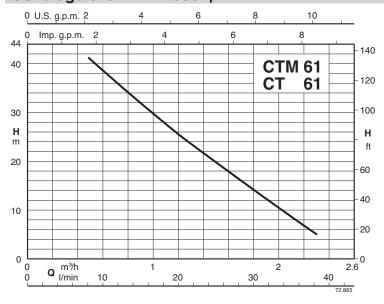

Constructed in accordance with: EN 60034-1;

EN 60335-1, EN 60335-2-41.

Special features on request

- Other voltages.
- Frequency 60 Hz (as per 60 Hz data sheet).
- Special mechanical seal.
